

## Activity XI – Closing the course

1. “The basic problem with our commonly accepted learning environment- the classroom - is that each person, each child, learns in a completely unique way. In many ways, each person's ideal learning method is as unique as his or her fingerprint.” Read some ideas about the Internet, learning and the future in [Future Solution: The Free School On the Internet](#).
2. In the folder “Closing the course”, there is an open discussion about the previous text. Attach a note with your comments about it.
3. Download the “Evaluation form” of this course from the above folder. Fill it in and save it in your computer.
4. Enter the discussion “Opinions about the course” in the folder “Closing the course”, and give your opinion.

### Task 11

Open a new folder inside the folder “Practices WebQuest” in BSCW. Call it “Course evaluation”, and upload the file you made in exercise 3.
